One of the many BU faculty who will become part of your professional network

BOSTON UNIVERSITY

Nonvikan Karl-Augustt,

As Senior Associate Dean for Academic Affairs, I understand the value of learning from faculty with diverse insight, derived from professional expertise, research and scholarship.

I am pleased to introduce **Professor Guanglan Zhang, PhD**, Assistant Professor, Chair of the Department of Computer Science, and Coordinator for Health Informatics:

Professor Guanglan Zhang, PhD

- An expert in biomedical and healthcare fields, Professor Zhang's research focuses on machine learning, data mining, and knowledge management within these industries.
- Research projects include includes identification of vaccine targets, the development of a framework for the rapid development of next-generation biological databases, the design of diagnostic tools, and the building of analytical tools for pattern recognition from biomedical data.
- Served as a research associate at Harvard Medical School, senior bioinformatics engineer at Dana-Farber Cancer Institute, and project leader and senior research engineer at the Institute for Infocomm Research (previous name: Kent Ridge Digital Lab), Singapore
